Jira Software

MORE

Import your work

## Scrum

[Use template](#)

The Scrum template helps teams work together using sprints to break down large, complex projects into bite-sized pieces of value. Encourage your team to learn through incremental delivery, self-organize while working on a problem, and regularly reflect on their wins and losses to continuously improve.

**Plan upcoming work in a backlog**

Prioritize and plan your team's work on the backlog. Break down work from your project roadmap, and order work items so your team knows what to deliver first.

[Learn more about the backlog](#)**Organize cycles of work into sprints**

Sprints are short, time-boxed periods when a team collaborates to complete a set amount of customer value. Use sprints to drive incremental delivery, allow your team to ship high-quality work and deliver value faster.

PRODUCT

Jira Software

## RECOMMENDED FOR

Teams that deliver work on a regular cadence

DevOps teams that want to connect work across their tools

## ISSUE TYPES

- Epic
- Story
- Bug
- Task
- Sub-task

## WORKFLOW

Next: Select a project type

[Back to project template](#)

## 1 Project template

### Scrum

Sprint toward your project goals with a board, backlog, and roadmap.

[Change template](#)

## 2 Choose a project type

You'll need to create a new project if you decide to switch project types later.

### Team-managed

#### Set up and maintained by your team.

For teams who want to control their own working processes and practices in a self-contained space. Mix and match agile features to support your team as you grow in size and complexity.

[Simplified configuration](#)[Select a team-managed project](#)

### Company-managed

#### Set up and maintained by your Jira admins

For teams who want to work with other teams across many projects in a standard way. Encourage and promote organizational best practices and processes through a shared configuration.
